Do your part in 2017

Join the Team!

Here's a New Year's resolution every sheet metal worker should make:

“I’ll do my part in 2017 to make the union labels work for me and my fellow union members.”

The labels are how we stand up for ourselves and each other to protect jobs, wages, and benefits. But everyone must pitch in. Fabricators apply labels. Installers scan them (and tell their local when wage equalization is due) and report unlabeled products. Local union leaders enforce the contracts.

Labels work when we work together.
